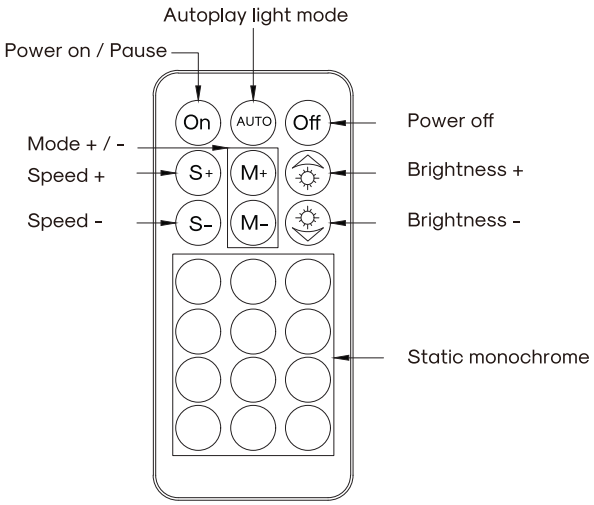
OPERATION INSTRUCTIONS



MAIN TECHNICAL PARAMETERS

Parameters	Min	Normal	Max	Unit
Rated voltage (DC)	4.45	5	5.20	V
Maximum current		0.5		A
Environment temperature	-20		60	˚C

FUNCTION

1. The remote control can be used for several purposes. a) controlling the light mode of the table. b) adjusting the brightness of the light and c) the light flow and speed of the light (with 3 different light presentations i.e modes).
2. Memory control of the mode function. The remote will automatically save the mode you want. Just let the remote turn itself off in your preferred mode and this will now be the standard mode.

TROUBLE SHOOTING

Question: The light flashes abnormally after turning on:
Solution: a) Restart the light b) Check if the power adapter is installed correctly and works normally

Question: The light doesn't light up after turning on:
Solution 1: Check if the spacer is removed from the remote control. (transparent film at the end of the control)
Solution 2: a) Restart the light b) Check if the power adapter is installed correctly and works normally.
Solution 3: Check and see if all the light bar lines are plugged inn properly
Solution 4: Check if the start light on the remote is working
Solution 5: Replace the battery if the battery is dead
(the remote works better the closer it is to the desk – maximum distance from the desk is 12 meter)
